

ABHINAV SINGH

AdTech Analytics • Marketing Analytics • Data Engineering

+91 7019094365 • abhisingh170801@gmail.com • Bengaluru, IN • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 3 years of experience across AdTech, product analytics, marketing analytics, and BI automation. Experienced in SQL, Python, PySpark, Power BI, Tableau, and Databricks, with a strong track record of building revenue diagnostics, customer analytics frameworks, automated reporting workflows, and production data pipelines. Skilled at turning ambiguous business problems into scalable analytical systems that improve visibility, reduce manual effort, and support faster stakeholder decisions.

SELECTED CAREER HIGHLIGHTS

- Surfaced **~\$50K in media-spend optimization** by building standardized global DSP IO Mapping pipelines across the US, UK, Canada & SEA.
- Converted a Power BI metadata-comparison POC across 6,000+ dashboards into a **\$45K project engagement**, enabling Fabric capacity optimization & dashboard governance.
- Designed a product recommendation engine (Cosine Similarity & LightFM) for Blue Nile, improving recommendation accuracy by **~40%** and lifting conversions by **~10%**.
- Cut repeat analysis effort by **~50%** through a modular Databricks code-template library standardizing deduplication, EDA & schema documentation.
- Contributed to **~\$10K in compute savings** via an automated DSP Discrepancy & Data Stability pipeline across Tier-1 DSPs (DV360, TTD, Yahoo, Amazon).

TECHNICAL SKILLS

Data Analytics & BI: Data Analysis, Data Profiling, EDA, Statistical Modelling, Data Visualization, Data Validation

Tools & Languages: SQL, Python, PySpark, Tableau, Power BI, ML/NLP, Azure Data Factory, Bitbucket

Databases & Platforms: MySQL, Databricks, Snowflake, Azure Cosmos DB, Google BigQuery, DBT Labs

GenAI & Automation: LLM-Assisted Analytics, Cursor, MCPs, Agent Creation, Prompt Engineering, Workflow Automation

Management & Strategy: Agile, Scrum, Stakeholder Management, Mentoring, Data Literacy, Roadmap Creation

PROFESSIONAL EXPERIENCE

Data Analyst 2

Dec '25 – Present

MiQ Digital Pvt. Ltd. • Bengaluru, IN

- Engineered an automated **DSP Discrepancy & Data Stability pipeline** across Tier-1 DSPs (DV360, TTD, Yahoo, Amazon) with daily KPI monitoring & executive Slack reporting, contributing to **~\$10K in compute savings**.
- Built & standardized global **DSP IO Mapping pipelines** across the US, UK, Canada & SEA, enabling IO-level monitoring that surfaced **~\$50K in media spend optimization**.
- Migrated MiQ Sigma's Browsing Feed from deprecated **Xandr to Index Exchange** via a scalable PySpark pipeline across 11 countries, restoring live product functionality.
- Architected an **agentic EDA & documentation workflow** (Cursor + Claude + MCP across Jira, Bitbucket & Databricks), cutting **documentation effort from days to just 10 minutes**.
- Spearheaded a modular **Databricks code-template library** standardizing deduplication, table-level EDA & schema documentation, reducing repeat analysis effort by **~50%**.
- Owned & automated **6 critical Campaign Management pipelines** within weeks of joining, reducing recurring analyst overhead & freeing teams for strategic POCs.

Senior Associate – Business Analyst

Apr '25 – Dec '25

Affine Analytics (Client: Microsoft MSN Bing Ads Marketplace) • Bengaluru, IN

- Owned **MSN AdTech revenue diagnostics** across markets, page types, ad formats & demand partners, explaining monetization movement for stakeholders.
- Built **monetization dashboards (RSMS & Top Contributors)** decomposing revenue into rate, mix & volume drivers and ranking top contributors, sharply reducing manual reporting.

- Refined **Ruby vs Classic experience segmentation** using Canvas, OCID & Placement identifiers, correcting misclassification & re-validating revenue/impression shares.
- Optimized large **Power BI models from ~4.8GB to under 1GB**, resolving DirectQuery & memory limits to keep enterprise refreshes stable.
- Automated recurring **stakeholder commentary via Copilot/Agora** workflows, accelerating daily & weekly revenue reporting cycles.
- Built **unmapped-publisher alerting & data-validation checks**, surfacing mapping & data-quality gaps before they reached stakeholders.

Associate – Business Analyst / Graduate Analyst

Jul '23 – Mar '25

Affine Analytics (Clients: Shutterstock, Blue Nile & DuPont) · Bengaluru, IN

- Converted a **Power BI metadata-comparison POC across 6,000+ dashboards** into a **\$45K project engagement**, enabling Fabric capacity optimization & dashboard governance.
- Independently owned the **Brand & Marketing Analytics thread** for Shutterstock across pricing, churn, referral & credit reporting, driving data-backed business decisions.
- Applied **channel-mix & pricing analysis** contributing to a **~\$180K uplift in video footage revenue & improved order recovery**.
- Built **Customer 360 & Monthly Browsing dashboards** consolidating sales, browsing & returns data, improving customer visibility for marketing & retargeting.
- Built **subscription churn & lifecycle analysis** classifying customers into lifecycle stages, supporting measurable improvement in retention.
- Sized a **PremiumBeat enterprise upsell opportunity** by matching business-domain purchasers to company-size data & applying enterprise AOV across employee bands.
- Created & QC'd a reusable **Customer Attributes data layer (SQL)**, fixing join/aggregation bugs to keep downstream dashboards & segments trustworthy.
- Designed a **product recommendation engine** (Cosine Similarity & LightFM) for Blue Nile, improving recommendation accuracy by **~40%** & lifting conversions by **~10%**.

EDUCATION

Dayananda Sagar College of Engineering

Aug '19 – Jun '23

B.Eng. – Computer Science & Engineering · CGPA 8.12/10 · Bengaluru, IN

PUBLICATION

Modelling Autonomous Driving & Obstacle Avoidance using MMFT Framework

International Journal of Innovative Science & Research Technology (IJISRT) · Feb '23

Defined a Multi-Modal Fusion Transformer for autonomous driving, integrating camera & LiDAR data to enhance trajectory prediction. Demonstrated via lane-detection simulation and recognized by IJISRT & the Karnataka State Council for its innovative traffic applications.
