PROFESSIONAL SUMMARY

Data analytics and engineering professional with 3 years of experience building production data pipelines, analytical products and applied machine learning solutions across AdTech and e-commerce. Proficient in SQL, Python, PySpark, Databricks and Snowflake, with experience processing billion-scale data, strengthening data quality, automating recurring workflows and translating customer and revenue signals into product decisions. Proven record of delivering scalable systems with measurable gains in revenue, conversion, performance and operational efficiency.

TECHNICAL SKILLS

Data Languages & Processing: SQL, Python, PySpark, Apache Spark, Apache Hive

Data Engineering & Platforms: Databricks, Snowflake, Apache Airflow, dbt, Azure Data Lake, Azure Data Factory, Azure Cosmos DB, AWS S3, Google BigQuery, MySQL, ETL/ELT, Workflow Orchestration & Automation

Data Science & Analytics: Machine Learning, scikit-learn, Classification, Predictive & Statistical Modeling, Feature Engineering, NLP, Price Elasticity, Customer Segmentation, Quasi-Experimental Design

Visualization & AI Tools: Power BI, Tableau, Business Intelligence, KPI Development, AI-Assisted Analytics (Cursor, MCP)

Delivery & Collaboration: Git/Bitbucket, Agile, Stakeholder Management

PROFESSIONAL EXPERIENCE

Data Analyst II

Dec 2025 – Present

MiQ Digital · Bengaluru, IN

- Built automated DSP discrepancy and data-stability pipelines for Tier-1 DSPs on incremental processing with a T-7 look-back, enabling daily KPI and SLT monitoring; cut runtime from 2 hours to 20–30 minutes via date, advertiser and seat partitioning, driving ~\$11.5K in compute cost optimization.
- Designed data models for DSP IO-mapping and Index Exchange tables joined to IAB category standards across the US, UK, Canada and SEA, surfacing ~\$82K in media-spend opportunities.
- Migrated MiQ Sigma's Browsing Feed from Xandr to Index Exchange on a PySpark pipeline processing billions of daily records across 11 countries, cutting runtime ~60% with no production downtime.
- Automated 6 business-critical Campaign Management pipelines within weeks of joining on daily, weekly and monthly cron scheduling in Databricks Workflows, with alerting and job failure handling.
- Built API-based ingestion for 7 platforms (Yahoo, TTD, Beeswax, Snapchat, Pinterest, Amazon) scoped to only the seats required, standardizing deduplication and validation to cut ~40 analyst hours/month.
- Built an AI-assisted EDA and documentation workflow on Databricks using Cursor and MCP, with reusable templates for deduplication and schema checks, cutting turnaround from days to ~12 minutes.

Senior Associate - Business Analyst

Apr 2025 – Dec 2025

Affine Analytics (Client: Microsoft MSN Bing Ads Marketplace) · Bengaluru, IN

Promoted twice in 30 months: Graduate Analyst → Associate BA → Senior Associate BA

- Led MSN AdTech revenue diagnostics across markets, page types and demand partners, drilling from SSP dashboard revenue drops to placement-level bid rejection analysis to surface insights for stakeholders.
- Owned MSX to Xandr reconciliation via Hive over TB-scale log-level data in Cosmos DB, sampling peak hour auctions to cut flight analysis ~50% to a consistent 2 days at zero data loss and revenue parity.
- Standardized a rollback-safe restatement and backfill process across 1P, 3P and MSAN partners, validating logic changes in Stage and Fact before merging to the consolidated table.

- Developed SSP monetization dashboards (Top Contributors, RSMS) decomposing revenue metrics into rate, mix and volume drivers, reducing manual reporting by 90%.
- Built ETL pipelines across 20+ SSP and reporting sources, landing partner data in Azure Data Lake and triggering Azure Data Factory on arrival, improving refresh latency 45% and query performance 75%.
- Cut Power BI model size from ~4.8GB to under 1GB via star schema remodelling and DAX conversion, resolving DirectQuery limits and enabling a page type reassignment tied to ~\$0.64M in revenue.

Associate - Business Analyst / Graduate Analyst

Jul 2023 – Mar 2025

Affine Analytics (Clients: Shutterstock, Blue Nile & DuPont) · Bengaluru, IN

- Built a Power BI metadata framework pulling PBIP definitions and report exports across 6,000+ dashboards via the Power BI REST API, converting the POC into a \$45K Fabric governance engagement.
- Analyzed user behavior across Shutterstock landing funnels and Pond5 feature adoption in Snowflake, isolating checkout drop-off and flagging referral click-farm traffic across millions of sessions.
- Built dbt models on Apache Airflow unifying Blue Nile browsing and purchase data into a funnel dashboard for drop-off analysis and an eligibility layer driving recommendation frequency by lifecycle stage.
- Replaced a LightFM collaborative model with content-based cosine similarity over TF-IDF product features and decile price tiers for Blue Nile cross-sell, improving accuracy ~40% and lifting conversions ~10%.
- Applied a quasi-experimental design to Pond5's staggered US-then-ROW pricing standardization, recommending an HD drop from \$59 to \$39 after it ran ~30% below benchmark while 4K held 24% above, validating the price-sensitivity hypothesis to recover ~\$104K HD and ~\$53K 4K revenue.
- Quantified price elasticity of Pond5's 60% ROW discount, finding returning buyers price-insensitive with discounts leaking via USD/EUR orders, and recommended a phased rollback.
- Built segment-level churn models in Snowflake using feature engineering and forward-looking labels, benchmarking logistic regression and XGBoost to drive retention campaigns with a 30% win-back rate.

EDUCATION

Dayananda Sagar College of Engineering

Aug 2019 – Jun 2023

B.Eng. – Computer Science & Engineering · CGPA 8.12/10 · Bengaluru, IN

PUBLICATION

Modelling Autonomous Driving & Obstacle Avoidance using MMFT Framework

International Journal of Innovative Science & Research Technology (IJISRT) · Feb 2023

Defined a Multi-Modal Fusion Transformer for autonomous driving, integrating camera & LiDAR data to enhance trajectory prediction. Demonstrated via lane-detection simulation and recognized by IJISRT & the Karnataka State Council for its innovative traffic applications.
