

# Abhinav Singh

Data Analyst 2 | AdTech • Marketing Analytics • Data Engineering

+91 7019094365 | abhisingh170801@gmail.com | Bengaluru, IN | [LinkedIn Profile](#)

## PROFESSIONAL SUMMARY

Data Analyst with 3 Yrs. of Experience across AdTech, Product & Marketing Analytics. Experienced in building scalable PySpark & SQL-based data pipelines, automating DSP monitoring workflows & delivering analytics solutions across both Product & AdTech domains. Skilled in Python, Databricks, Tableau & Power BI with strong experience in automation, dashboarding & cross-functional stakeholder collaboration.

## TECHNICAL SKILLS

**Data Analytics & BI:** Data Analysis, Data Profiling, EDA, Statistical Modelling, Data Visualization, Data Validation

**Tools & Languages:** SQL, Python, PySpark, Tableau, Power BI, ML/NLP, Azure Data Factory, Bitbucket

**Databases & Platforms:** MySQL, Databricks, Snowflake, Azure Cosmos DB, Google BigQuery, DBT Labs

**Management & Strategy:** Agile, Scrum, Stakeholder Management, Mentoring, Data Literacy, Roadmap Creation

## PROFESSIONAL EXPERIENCE

### MiQ Digital Pvt. Ltd.

Dec '25 - Present

#### Data Analyst - II

Bengaluru, IN

- Engineered automated DSP Discrepancy & Data Stability Pipeline for Tier-1 DSPs, enabling daily KPI monitoring & executive Slack reporting. This reduced manual analysis efforts & contributed to **~\$10K in compute optimization savings** through pipeline automation.
- Owned & automated **6 critical Campaign Management pipelines** within weeks of joining, reducing recurring analyst overhead & enabling teams to focus on strategic POCs & post-Xandr deprecation onboarding initiatives.
- Built & standardized global DSP IO Mapping pipelines across the US, UK, Canada & SEA, enabling granular IO-level monitoring that helped identify opportunities contributing to **~\$50K in media spend optimization**.
- Migrated MiQ Sigma's Browsing Feed from deprecated Xandr to Index Exchange by developing a scalable PySpark pipeline across 11 countries, **enabling a new DSP partner integration & restoring live product functionality**.
- Spearheading a modular Databricks code template library to standardize recurring deduplication, table-level EDA & schema documentation across shared datasets, **reducing repeat analysis effort by ~50%** & helping teams validate production tables faster with less dependency on tribal knowledge.

### Affine Analytics (Clients: Microsoft Bing Ads, Shutterstock, Blue-Nile & DuPont)

Jul '23 - Dec '25

#### Sr. Associate - Business Analyst / Associate - Business Analyst

Bengaluru, IN

- Led **end-to-end ad performance & marketing analytics** across browsers, content platforms & campaign ecosystems driving revenue attribution, impression delivery optimization & strategic decision-making across client engagements.
- Built automated KPI dashboards, Customer 360 reporting & ETL pipelines across 20+ data sources, reducing manual reporting **effort by up to 90%**, improving data refresh **efficiency by 45%** & reducing **query runtime by 75%**.
- Converted a Power BI metadata comparison POC **across 6,000+ dashboards** into a **\$45K project engagement**, enabling Fabric capacity optimization & scalable dashboard governance.
- Designed & deployed recommendation systems, churn prediction & customer analytics solutions using LightFM & Cosine Similarity, improving **retention by 10%**, increasing sales **conversions by 10%** & enhancing customer targeting strategies.
- Optimized referral programs, pricing experiments, A/B testing initiatives & marketing channel strategies contributing to **25% increase** in user engagement, **43% ROI** improvement, **15% order recovery** & **\$182K growth** in video footage revenue.
- Led the Brand & Marketing Analytics thread while automating placement mapping & bidder-level revenue tracking workflows, reducing manual **effort by 70%** & accelerating project delivery through cross-functional collaboration.

## EDUCATION

### Dayananda Sagar College of Engineering

B.Eng. – Computer Science & Engineering (CGPA - 8.12)

Aug '19 - Jun '23

Bengaluru, IN

## PUBLICATION

### Model Autonomous Driving & Obstacle Avoidance using MMFT Framework

International Journal of Innovative Science & Research Technology (IJISRT) | Jan '23 – Jun '23

Defined a Multi-Modal Fusion Transformer for autonomous driving, integrating camera & LiDAR data to enhance trajectory prediction. Demonstrated via lane detection simulation & recognized by IJISRT & Karnataka State Council for its innovative traffic applications.
